Hi Adam,

<https://www.oregon.gov/oha/PH/HEALTHYENVIRONMENTS/DRINKINGWATER/SOURCEWATER/DOMESTICWELLSAFETY/Pages/Program-Information.aspx>

Here's a link to the domestic well program here at OHA. I'm sure the manager, Curtis Cude, will know about the status of the regional water quality database.

I haven't talked to anyone about the database for about a year, but what I remember is that it was a joint program managed by some university and environmental quality agencies in both Oregon and Washington. I would imagine there's still a way to query data, even if the public access isn't available any longer.

Curtis should be able to answer any specific questions you have.

Think twice before clicking on links or opening attachments. This email came from outside our organization and might not be safe. If you are not expecting an attachment, contact the sender before opening it.

Peter and I spoke with Dave Emme last week about a petition we received regarding the state of groundwater in the lower Umatilla basin and nitrate contamination. Dave said there was a real estate database hosted by another section of OHA. Can you send me in the right direction?
